

## Project Assessment

Name: \_\_\_\_\_

Grade: \_\_\_\_\_

### **Activity: Build a bug hotel**

Mini beasts are great for your garden. They break down waste and help to pollinate plants and bug hotels are a brilliant way to encourage them.

You can use lots of things already in your garden such as bits of wood, moss, bamboo canes, twigs, old pots, wood chips and dry leaves.

Choose some firm ground and stack your different materials up leaving lots of little holes and space for bugs to make a cosy home.

The RSPB have some great instructions on how to make one [here](#)

You could even make a little sign so the bugs know your hotel is open for business.
